

Stowaway Tailgate Grill Station Assembly Instructions

Rev101012

Please read all instructions prior to installation or use.

Parts included:

- Swingaway rack frame
- Cargo rack & assembly hardware
- Cuisinart grill
- Cutting board
- 4 loop clamps for mounting grill to rack
- 4 bolts, washers & lock nuts for loop clamps
- Hitch tightener

Directions:

- 1) Assemble the cargo rack per the enclosed instructions.
- 2) Identify your preferred grilling configuration. The grill can be mounted one of two ways, depending upon which side of your vehicle you will be grilling from (this will be determined largely by your parking space configuration).

You can mount the grill such that when you are cooking, you are standing directly behind your vehicle (as in left photo) or that you are standing off to the side of your vehicle (as in right photo).

- 3) Be sure to place the outer "leg" of the grill *inside* the outer rack bar to allow enough room to connect the propane tank.

- 4) Mount grill on the rack and secure with the four loops clamps.

*Close up of loop clamp
from below the grill.*

- 5) Grill comes pre-drilled with a hole in the base to attach the grill to the rack via a padlock. Padlock not included. "Long-neck" padlock recommended.
